Disaster Declaration signed in CaddoParish

Monday, April 16, 2018

City of Shreveport and Caddo Parish officials are in the process of documenting damage from this past weekend's storm, said Caddo Sheriff Steve Prator.

A Declaration of Disaster was signed this morning for Caddo Parish and has been sent to the Governor's office to be considered along with other parishes in seeking a Presidential Declaration of Disaster. A presidential declaration could open avenues of funding for those who received damages during the storm.

Requests have also been made to the Governor's office for state and federal damage assessment teams come into the area, which is another part of the process to possibly receive funding.

Citizens who have been affected by this storm are asked to call the Caddo Sheriff's Office of Homeland Security and Emergency Preparedness at (318) 675-2255 and report their damages as soon as possible. Citizens are also asked to register with the Federal Emergency Management Agency online at fema.gov or by calling 1 (800) 621-3362. Assistance from volunteer agencies can be accessed by calling 211 or logging onto LINCC.US.

"We want to catalog this on the front end so we would encourage those who were affected to register as soon as possible," said Sheriff Prator, who also serves as Director of the Caddo Parish Office of Homeland Security and Emergency Preparedness. "Regardless of whether assessment teams come to our area or we receive federal assistance, having a record of damages allows local volunteer agencies active in disasters to know where to direct their resources."
