Posted by Brandon Fountain

We are excited to announce that the new Caddo Sheriff's App is live. You can access the app through the following link: https://www.caddosheriff.org/app. The link will recognize if you have an iPhone or an Android and will direct you to the appropriate store.

The new app, along with our recently updated website, offers many exciting features not available in the previous version. This includes a real-time Caddo 911 calls service page. We are committed to ongoing improvements for both the app and the website. In the future, you can look forward to additional features, such as enhanced push notifications through the app for important messages to the citizens of Caddo Parish. We are also developing a crime mapping feature that will allow you to view all reported crimes in your area or any location within Caddo Parish on our app. Additionally, we will be adding a page outlining the chain of command, which will enable you to see the deputies in charge of each division.

Sheriff Whitehorn is dedicated to serving the citizens of Caddo Parish and aims to keep them informed about the events in the Sheriff's Office and the parish.
